Recommendation for iDa Mobile

Dear Sir or Madam,

It is my pleasure to express our satisfaction and convey our recommendations for the software and services provided by iDa Mobile (represented by Virtual Solutions LLC in Russia).

iDa Mobile provided TCS Bank with versatile mobile client and server-side software components, which were fully customized according to our requirements and integrated into the existing infrastructure, creating full-featured, innovative mobile banking solution for TCS Bank's retail customers.

I think it's the dependable service, flexibility and cooperativeness that really sets iDa Mobile team apart. We had short critical timelines to develop and deploy mobile apps for iPhone and Android devices. The initial software parameters and user interface design were not clearly defined and changed as the solution was developed. iDa Mobile quickly adapted to this environment by providing good customer support and delivering the solution on time.

The professionalism of iDa Mobile staff met our expectations and maintained their professional standards at all times. The product and engineering team has shown exceptional knowledge of enterprise system architecture and mobile software platforms which resulted in high quality of the software as well as project documentation.

In closing, the iDa Pro software package is a high quality product, that delivers real value at competitive price. I truly recommend iDa Mobile and their iDa Pro package for your mobile needs. They have energy, knowledge, innovativeness and product vision to please your customers.

Yours faithfully,

Viacheslav Tsyganov

Vice-President
